

# Boycott Money And Save Your Soul

## Introduction

This book is an invitation to join the Goodwill Revolution against the addiction, worship and corrupting influence of money by organizing around 'goodwill to all' including our enemies in order to:

- achieve a more happy meaningful life
- recapture our democracy
- build a better world
- save our soul.

Man is basically good and has made astounding technological advances but our but our world continues to disintegrate into senseless violence, vicious crime, wars, devastating poverty and personal and national hostilities. Why? Primarily, because a small rich powerful ruling elite has addicted us to money and manipulated our value system. These money-pushers feed our addiction largely by snob-appeal advertising and we reward them by coughing up the little money we have. So, we greedily gobble up disproportionately large amounts of the limited earth's resources and achieve 'money induced highs' which we mistake for happiness. Meanwhile the pushers amass even greater money, and then we pay great tribute and awe to them for amassing it, so much so that we make them our leaders. With pushers as leaders, no wonder the world is in shambles. If these leaders have ever done any good in their life, it is a coincidence. For the Goodwill Revolution, doing good is a primary requirement and riches will be the coincidence. We actively seek to be friends with everyone both personally and as a nation-to-nation goal.

This small rich powerful elite has used faceless corporations to buy our democracy and undermine the rights of our workforce because they think we are bargain-hungry dependent. But, we are goodwill-hungry more and we will fight back. Members of the Goodwill Revolution will not buy their people-exploited-bargains. We have lost democratic power but we have buying power and we shall use it. We shall let capitalism work for us.

Ruthless corporations dominate and manipulate the mass media. They bribe and intimidate our political leaders. But, we intend to enlist those millions of protesters who have marched against war and injustice into the Goodwill Revolution. Lets see these corporations try to bribe and intimidate them.

These numbers are just the tip on an iceberg and represent the real power of the people. Dr. Martin Luther King was on the verge of harnessing this power and we think this is the real reason why he was assassinated. But, it is raw untapped power and the Goodwill Revolution will take over where Dr. King left off and harness this power for goodwill and real democracy.

Our world is beset with international conflicts. Peace is elusive. But even peace is not good enough. It is only a transitional stage. Our foreign policy should be goodwill towards all the world including our enemies. Our own government's pursuit of satisfying "American self interest" as foreign policy is a root cause of world instability. Let us lead the world by making goodwill towards all the hallmark of our foreign policy and abandon selfish self-interest and its inevitable consequences.

The Goodwill Revolution will mobilize the unrecognized, unstoppable power of 'goodwill to all' to overcome the entrapment of this money mania and voracious

## **Boycott Money And Save Your Soul**

insatiable materialism. Hostility is our enemy so we will use only goodwill to spread the Goodwill Revolution. It is a systematic comprehensive realistic plan to redeem our strife-filled world by devaluing money and revaluing people.

For people is our top priority. All the resources, skills and energy we spend trying to be rich we will divert to improving our relationships with people, starting with our family and friends to people everywhere. And not just the nice people, the people we like, the people that look like us, but all people, including the people that do not even like us, the unpopular people and especially people of different cultures from us

Would you rather be happy or rich? The Goodwill Revolution will show you how to lead a caring, meaningful and happy life without being rich. So, who needs to be rich?
